SUMMARY

Full Stack Developer skilled in building REST APIs with Java and Spring Boot and responsive interfaces with React.js, backed by MySQL. Built a microservices-based e-commerce backend and an AI multi-agent code generator (Python, FastAPI, RAG). Strong in debugging, clean code and agile teamwork.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL
Backend: Spring Boot, Microservices, REST API Design, FastAPI
Frontend: React.js, HTML5, CSS3, Bootstrap
Database: MySQL, SQL Query Writing, Database Design
Tools: Git, GitHub
Practices: Agile and Scrum, Code Review, Debugging and Testing

EXPERIENCE

Code Tikki Private Limited Nov 2025 – Oct 2026
Full Stack Developer

- Designed and built RESTful APIs and backend services using Java and Spring Boot for smooth communication between the React frontend and the database.
- Developed backend logic integrated with MySQL, writing queries and handling data operations reliably.
- Built responsive UI components using React.js, HTML, CSS and JavaScript, improving usability across devices.
- Debugged and resolved application issues, improving stability and user experience.
- Worked in an agile team using Git for version control; participated in code reviews and applied coding best practices.

Wilexier Techno LLP Mar 2025 – Jul 2025
Frontend Developer

- Built responsive, scalable web pages in React.js and created reusable components that improved development speed and maintainability.
- Integrated backend APIs with the backend team, ensuring smooth and accurate data flow.
- Optimized UI performance and responsiveness; tested and debugged features to keep the application reliable.

Yhills Edutech Sep 2024 – Nov 2024
Full Stack Developer

- Created UI layouts with HTML, CSS, Bootstrap and JavaScript and shipped website features alongside other developers.
- Wrote SQL queries, handled database management tasks and CMS updates; improved the company website's functionality.
- Attended daily stand-ups and collaborated with developers to resolve coding issues.

PROJECTS

Agentic AI LLM Council – Code and Application Generator GitHub

- Built a multi-agent AI system that generates code and full applications from plain-language user requirements.
- Designed 4 specialized agents (frontend, backend, DevOps, security) that collaboratively analyze requirements and produce optimized solutions.
- Used RAG and prompt engineering for context retrieval and accurate code generation, reducing manual development effort.

E-Commerce Microservices Platform GitHub

- Built an e-commerce backend as independent microservices: User, Product, Category, Inventory, Order, Payment and Notification services.
- Set up an API Gateway, Config Server and Discovery Service for centralized routing, configuration and service-to-service communication.
- Designed the services around separate responsibilities so each module can be developed, tested and scaled independently.

EDUCATION

B.Tech, Computer Science and Engineering 2022 – 2026
Galgotias University, Greater Noida **8.0**

Class XII 2021
Scottish International School, Shamli **77%**

Class X 2019
St. Francis School, Shamli **80%**
